# TREMENDOUS DISCOUNTS ON HEWLETT-PACKARD CALCULATORS

WE WELCOME PURCHASE ORDERS FROM WELL-RATED SCHOOLS & UNIVERSITIES

## EXCITING NEW RELEASES

### HP-22S Scientific Calculator for Students

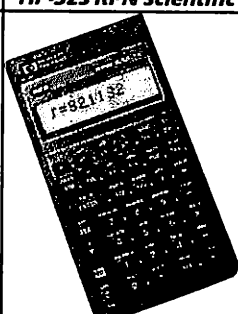

Order No. 491671  
Mfr. Sugg.  
Ret. \$59.95

**\$43**

- Algebraic entry system, alphanumeric display
- Equation-solving feature
- Built-in equation library
- Polar/rectangular conversions
- Two-variable statistics with linear regression
- Base and English/metric conversions

### HP-32S RPN Scientific Calculator

Order No. 491663  
Mfr. Sugg.  
Ret. \$69.95

**\$50**

- Alphanumeric display, keystroke programming
- Equation-solving feature
- Two-variable statistics with linear regression
- Complex numbers and numerical integration
- Base conversions and arithmetic

Hewlett-Packard has always set the standard for scientific and financial calculators. We welcome two new scientific models, the HP-32S and HP-22S, both of which offer many of the advanced features of our high-end calculators at a more affordable price. The ease of use, plain English displays and low price make these new additions ideal for the entry-level user. The HP-28S, 27S, 19B, and 17B, introduced earlier this year, remain state-of-the-art on the basis of their incomparably powerful functions and unique ability to interface with HP's portable infrared wireless printer, the HP-82240A.

### HP-27S Scientific Calculator

- Technical and business functions
- List based 1 and 2 variable statistics and curve fitting

Order No. 485583 Mfr. Sugg. Ret. \$110

**\$77**

### HP-28S Advanced Scientific Calculator

- 32K bytes of available user memory flexible graphics with graph storage and recall
- Symbolic algebra and calculus

Order No. 485575 Mfr. Sugg. Ret. \$235

**\$165**

### HP-17B Business Calculator

- Complete set of business functions
- Number lists with running totals and forecasting

Order No. 485559 Mfr. Sugg. Ret. \$110

**\$77**

### HP-19B Business Consultant II

- Business graphics
- Name and number lists with running totals and forecasting
- Most built-in functions available in a business calculator

Order No. 485567 Mfr. Sugg. Ret. \$175

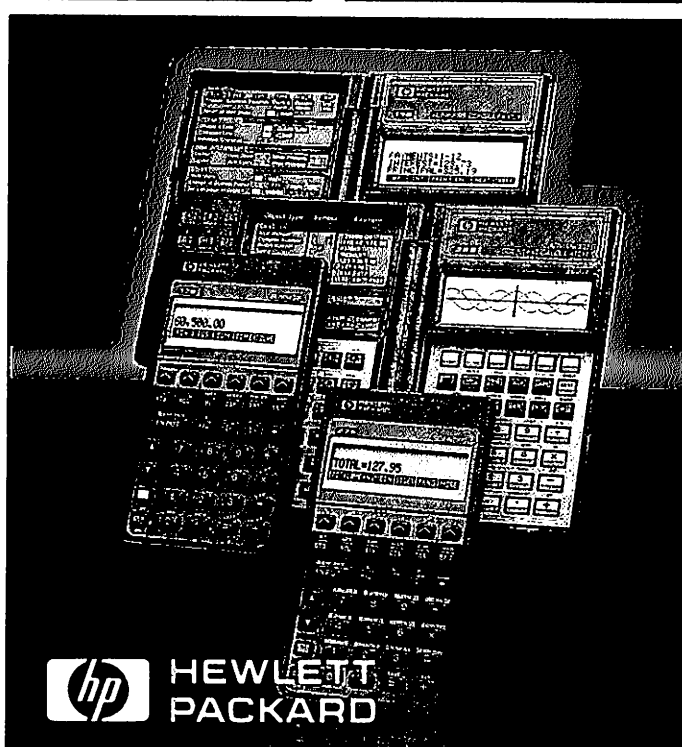

**\$121**

### HP-82240A Infrared Printer

- Wireless! Selective or continuous printing via infrared signals
- Plug-in compatibility with: 17B, 19B, 27S, 28S; only the HP41 CV and CX require module #HP 82242A (Ord. No. 454322)

Order No. 441816 Mfr. Sugg. Ret. \$135

**\$100**

# GET YOUR START IN NUCLEAR ENERGY WHERE NUCLEAR ENERGY GOT STARTED.

You've already chosen a career in a technical field—a career with a future. Now choose the perfect way to launch it: The Navy.

There's no better place to put all your technical training into practice than as an officer aboard the Navy's nuclear-powered ships.

The Navy launched the first nuclear-powered submarine in 1955. Today, the Navy operates more than half the nuclear reactors in the U.S. and is a recognized

leader in their development and operation.

As more nuclear-powered ships join the fleet, there is a greater need for qualified people.

If you're one of those people, the Navy can offer you a unique experience.

You'll work with top people and sophisticated technology. And you'll get all the challenges and responsibility you can handle.

Be part of an elite team.

See your Navy Officer Programs Officer today or call 1-800-327-NAVY.

Experience tomorrow's technology in today's Navy.

# Fighting the Flunk

*Colleges gear up to keep students in school*

By Jody Brannon

Nobody likes flunkies.

Dropping out of college is one thing, but failing to make the grade is another.

Students don't want to face family and friends as a failure. And colleges do not want to lose either the money a student spends over a four-year college career or to admit its academic screening process or advising system malfunctioned.

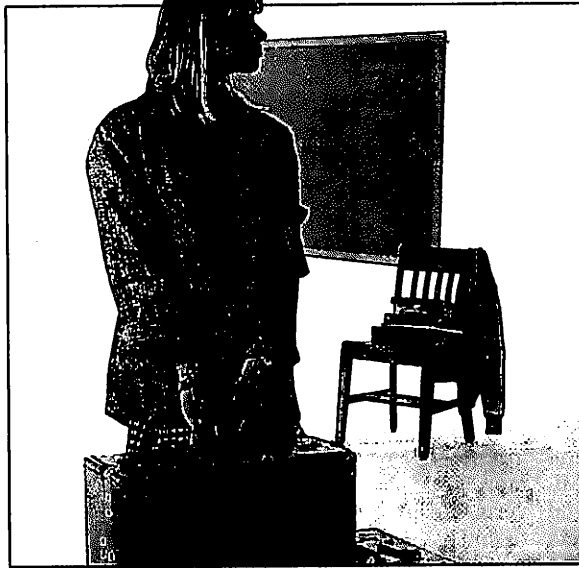

That's why in today's competitive college environment, schools strive just as hard to retain students as most students are trying to gain a solid education.

Today, schools with a 20 percent attrition rate straddle the national norm; the more selective and prestigious schools have attrition rates under 10 and perhaps as low as 2 or 3 percent. Each institution has its own formula for keeping first-year collegians in class as they face what one educator called "An incredible set of expectations."

Freshmen, with new academic and social pressures, tend to founder the most. Across the country, most colleges and universities have learning centers staffed by people trained to help students refine the basic skills needed to survive in college. These may range from hints on note taking to how to write a paper or how to read faster with greater comprehension.

These schools are not just pulling out the academic red carpet for the high-profile athletes whose heroics are needed on the field or court. Athletic programs may pull in the bucks but most of the students—those who go on to become business and community leaders who donate to alumni funds—are the ones colleges need to stay in schools. They are the ones upon whom the university's long-term reputation rests.

Most colleges schedule workshops or mini-seminars designed to polish study skills. If special help from professors isn't enough to overcome a problem, special faculty advisers may be available. Many schools even provide free tutoring.

At Notre Dame, for instance, free tutoring is available in situations where academic problems are "over and above what is reasonably expected of teachers," said Emil Hofman, dean of the College for Freshmen.

Notre Dame was a trailblazer in addressing particular needs of incoming freshmen. The College for Freshmen was conceived in the early 1960s but was not fully implemented until 1973. Today, more and more schools are developing their own freshmen programs, but few attain the scope of Notre Dame.

All first-year Fighting Irish enter what is called the Freshman Year of Studies. This curriculum is designed to make college manageable—academically, socially and emotionally.

Sessions with professors, private tutoring or services provided by the learning resource center are mere "Band Aids" for helping students overcome academic deficiencies, he said. Notre Dame's goal is to face the problems behind problems.

"We address what is the most troublesome feature of young life very directly," he said. "That troublesome feature is uncertainty."

Faced with so many options, young people sometimes flail, then fail. Col-

lege, Hofman says, is an opportunity to discover what life has to offer and to learn about the hundreds of directions it can lead. Notre Dame's freshman academic slate requires students to delve into humanities, natural sciences, math, social science and fine arts.

This helps freshmen feel as if they are all in the same boat, Hofman said. When peers face similar academic challenges, problems seem surmountable. Further, each of Notre Dame's 1,800 freshmen is assigned a staff adviser and a peer adviser. Touching base with each adviser is mandatory. And sometimes, if a shockingly poor test performance or an overtly

inappropriate action catches the attention of a faculty member, an adviser may require more meetings. Together, teacher and student will try to get to the base of the problem, whether it is academic or personal.

On the personal side, many universities such as Notre Dame concentrate on helping students adjust to campus life. A happy student is a student who stays in school, the theory says. So in South Bend, Ind., features of the freshman support system include shopping trips, picnics on Lake Michigan, snow parties and freshmen date nights, Hofman said.

Notre Dame's program is so effective, Hofman said 98 percent of the freshmen return for their second year. Those are the kind of numbers many schools lust over. Where many schools are incorporating some of Notre Dame's methods into their programs, they still must be individually refined.

For instance, at Evergreen State College in Olympia, Wash., the curriculum is far less structured than most colleges. In the mid-'60s, Evergreen's masterminds conceptualized a college that "would be a community of students, faculty and staff working together harmoniously and creatively."

Today, incoming students embark on what is called a "career pathway,"

which is the academic road toward achieving the interdisciplinary liberal arts degree. First-year students are encouraged to enroll in the yearlong core program, a foundation that leads to more specific study. At Evergreen students might enroll in "Reflections on Nature," or "Democracy and Tyranny." The core programs delve into literature, writing, history, philosophy, statistics and/or math and logic.

Stepping from high school into Evergreen's highly intellectual and independent-minded environment can be overwhelming. The adjustment process begins at autumn orientation.

First comes an informal Who's Who session. Directors of the support services are introduced. The 15 program secretaries, who know the ins and outs of their specific programs and professors, are on hand. Students learn about KEY, which stands for Keep Enhancing Yourself, and the various academic and personal skills development opportunities available through that department.

Returning students attired in matching blue T-shirts swarm around campus in the first weeks of a term. Approach someone in the blue T-shirt and receive friendly peer advice on subjects from how to deal with a certain professor to how to adjust to a roommate.

These peer advisers throughout the year hold regular sessions with small groups of freshmen to discuss life as a freshman. This rap group shares experiences, advice and perspectives. At these meetings, the students learn they are not alone and are facing many of the same, unvoiced problems of fellow freshmen.

If these rap sessions aren't enough, the core programs have potlucks and retreats. At Evergreen, as many other schools, communicating is the key to keeping students enrolled.

In 1970, Illinois Wesleyan felt a 20 percent attrition rate was unacceptable. Tim Barbour, now registrar at the Bloomington campus, decided to find out why. Exit interviews were conducted. He determined that about 10 percent of the students, through illness or relocation, could not be expected to stay. The other 10 percent, however, were in high-risk groups Barbour felt he ultimately could convince to stay.

The majority of those students leaving were those with an undecided major. At Wesleyan, it's too expensive to be undecided, students said. "So we made academic advising the cornerstone of our retention program," Barbour said.

Advisers were assigned and the attrition rate was cut in half, he said.

But Barbour wanted better. Further talks with students showed that many were leaving because they didn't feel their grades were good enough. After being academic all-stars in high school, many were abashed at their GPAs, Barbour said. They knew that a 2.3 wouldn't cut it in their goal to enter law or med school.

So again Wesleyan refined its academic services, offering writing workshops and free tutoring through the Academic Skills Center. Now, just

a handful of the 480 freshmen fail to return as sophomores, Barbour said.

At the University of California at Berkeley, attrition problems are much more severe. In the era of affirmative action, Berkeley recruits many minorities. Frankly, said Ken Jowitt, recently promoted to dean of undergraduate studies from dean of freshman-sophomore studies, many don't have the necessary academic skills. He said 72 percent of minorities don't complete their degree at Berkeley.

Because of such numbers, Jowitt expects significant changes in the nation's education structure. "I'm for having a retention program that is absent in academia right now, and that's one in courage," he said. "I'm suggesting that if you're coming to a prestigious university that makes demands on you that you can't meet right now, you may need a half-year or year of help."

He thinks many students need training before they can successfully carry a college workload, and he said the "overtaxed" Student Learning Center can't solve all the problems. Programs that recruit only middle-class students can survive easily, he said. However, those that target minorities may need to devise a program that essentially waives

tuition costs for up to a year, during which time the students would overcome learning deficiencies through intense remediation.

Where Jowitt lobbies for a beginner's curriculum designed to help students with communication skills, the University of South Carolina has refined a class that lets freshmen "assimilate the university culture and environment."

University 101 is a three-credit-hour class that about half of South Carolina's 3,000 freshmen take. The program has come a long way since it was implemented in 1972. It began after a riot by disillusioned students, which led the president to try to "humanize the university environment," said Mary Stuart Hunter, co-director of the University 101 program.

First came a redesigned freshman seminar that helped incoming students adjust; but adjunct to it was a faculty development workshop designed to explain the mindset of freshmen and to refine their teaching skills.

Today, each instructor teaching University 101 (South Carolina has about 60 sections yearly with 20 to 25 students in each) must participate in a 40-hour workshop.

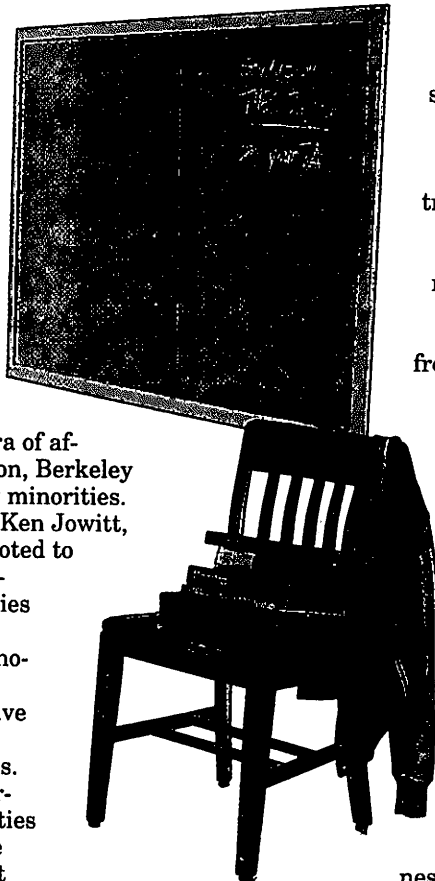

The program changes with the times, discussing drug and AIDS aware-

ness, as well as providing specifics on how to use campus services to get help with refining study skills or career development.

South Carolina feels it has "championed the cause for freshmen" and regularly invites educators to Columbia to learn ways to make freshmen happy and therefore enrolled. Schools from Bentley College in Massachusetts to Southern Illinois at Carbondale have developed their own University 101 programs.

Catering to the needs of freshmen doesn't mean there won't be drop-outs, transfers or flunkies, but it does ensure that those students determined to finish college have the opportunity.

# Students of Style

College students get high marks for fashion finesse

By Marilyn M. Bailey

It might not be what they're showing at the salons in Paris but college students all over the United States have an eye for fashion that's just as distinctive as Chanel's short cropped jackets and tailored suits.

And while almost every campus reflects its own style, the underlying trend from the University of Wisconsin to the University of Kentucky to Washington State University relies on one thing—comfort.

Faded jeans with ripped out knees and oversize sweatshirts with a logo emblazoned on the front make up part of the college look. Cotton sweaters, fitted jeans and spiky shoes combine to form a style that says these clothes are fun but functional.

You won't find a lot of synthetics here. These are clothes

made from cotton and natural fabrics. These are clothes that last, clothes that feel good, clothes that aren't restrictive in any way. Clothes that are identifiable as collegiate to the core.

You need only to go to any department store and check out the clothing sections that cater to the 18-23 age group and you'll find shoppers who have a talent for pulling together a wardrobe of eclectic items.

"Really the college market is unique," says Glenn Farraye, the northeast sales representative for Generra, a Seattle-based clothing manufacturer that scores well in the college-age market.

"The college student is buying apparel that will last a couple of years as opposed to the person who has a little bit more expendable

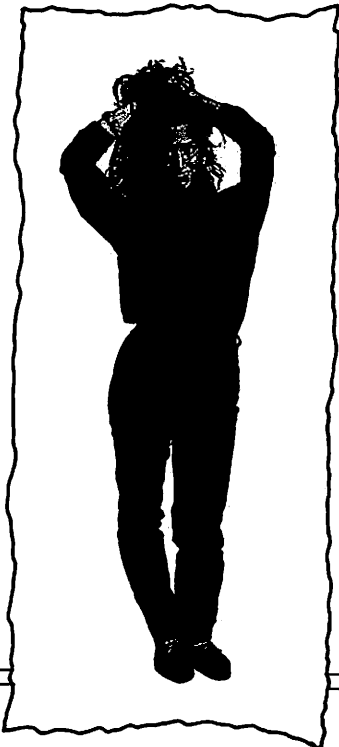

money to be able to buy something, wear it once and put it in the back of his closet. So what they're looking for is a more relaxed style."

This relaxed style shows up in clothes that are comfortable yet make a statement about the individual's personality.

"College is a great time of life," says Mike Alesko, president and founder of International News, the company whose clothing has found a niche in the 18 to 23 age market. "There are no real parameters and there's a real 'go for it' attitude so the best surfaces. So what you have are a lot of free lance artists who have no demand to be regimented."

Alesko says college students as a result are looking for that which makes them feel good and

Photos by Wynn Kendall

has value at the same time.

"And comfort is the key ingredient. They have the ability to intermix and interchange with whatever is dominant and they're choosing products that show they feel good about themselves," said Alesko.

Another company which does well with the college-age buyer is Esprit. According to Lisa De Neffe of Esprit, their main market is targeted toward the 26-year-old, but as she says, "No one at Esprit wears a suit to work."

Esprit emphasizes that everyone sets his own style and the importance of the individual, and according to De Neffe, Esprit gives the buyer the tools to that. Their clothes are comfortable and casual and this fits in well with the college student's lifestyle.

Clothes are colorful and may have a whimsical touch but they're functional and useful. De Neffe says Esprit's two super stores—one in Los Angeles and in Georgetown, both located near college campuses—draw considerable business from the collegiate crowd. The West Coast store tends to be a little more trendy and fast-paced, and the D.C. store a little more preppy.

So what are the differences coast to coast? According to most fashion experts they are more environmental than anything else.

"You see a variety of looks on the college campuses," says Kathy Valentine, fashion director for Nordstrom's Tyson's Corner store in McLean, Va.

"Depending on where the student comes from—if it's a beach area, the fashion is a little more relaxed, like jeans with holes in them. In the Northeast, it's high fashion which means instead of jeans, students wear mini skirts and tights and then there's the preppy look with fitted jeans and pennyloafers."

So what will we be seeing on campuses this fall that fits this mode? The experts say more of the same with lots of colors.

"For a while everyone was into black, but this fall it's purple and fuschia and reds. The black is still there but they're adding to it," says Valentine.

At Generra, cotton is still king and Farraye predicts a little more dressy look in some areas. For men there are all cotton pleated trousers with cuffs and fabrics that have patterns. Many of their clothes will have leather trim along the seams for a more distinctive look.

In addition to the bright colors, companies such as Esprit will feature colors such as plum and browns which work well with their mix and match concept.

As always jeans are the mainstay around which the wardrobe revolves. Faded jeans are still hot although the acid wash look is fading.

College women will continue to borrow from the men's look with oversize outfits and lots of layering, although fitted cotton knit sportswear is big this season with colorful tops paired with

snug skirts which hit anywhere from thigh high to top of the knee.

Also instead of skirts, walking shorts are shown with short and long fitted jackets. The look is pulled together with colorful matching or contrasting tights.

While solids are still prevalent, this fall the plaid craze has hit as well as more paisley designs and tiny "interesting" patterns. Socks, either rolled or scrunched down with low boots, are ablaze with color. Accessories for women show either oversize or tiny little purses and big, novelty odd-shaped earrings. Sport watches are still in for guys.

And, of course, there's the preppy look with oxford cloth blouses or shirts or cotton polo shirts and khaki pants, madras shorts and loafers.

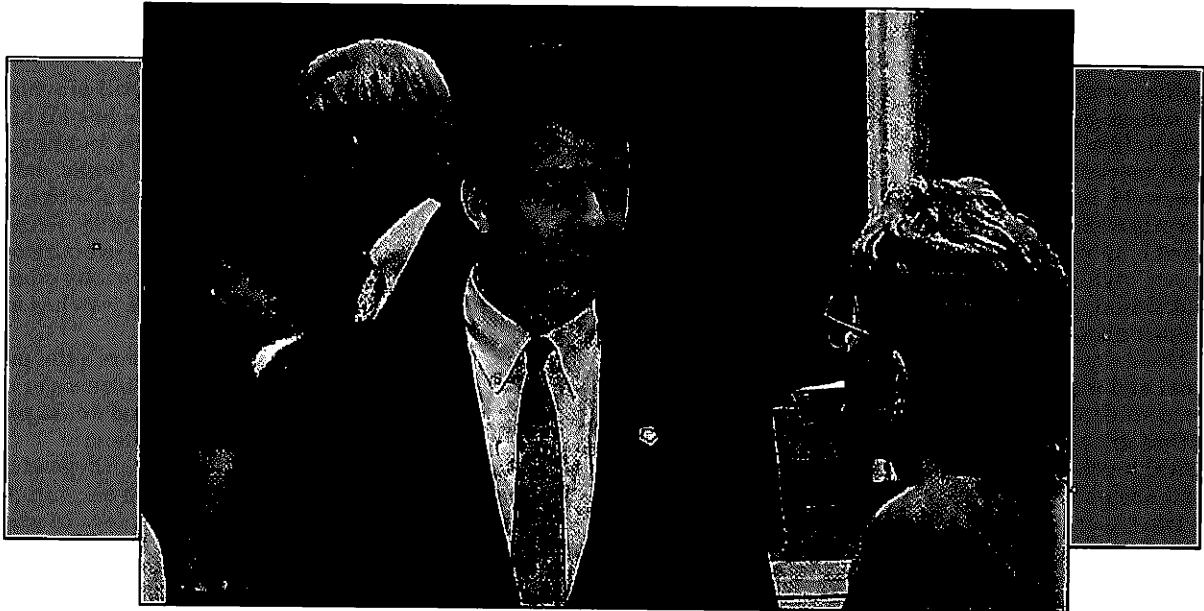

But whatever the college student chooses, you can bet on one sure thing—it'll be selected with an eye to what looks and feels good.

"That's what's wonderful about college," says Alesko. "You search out what you want to be part of. College students are pretty good entrepreneurs of their own destiny, whether it's shorts or T-shirts, they're comfortable with their bodies and in tune with the world."

# RISING TO THE TOP

Mike Sims talks to voters on the campaign trail.

Photo by Sam Pierson

## Recent grads make the national spotlight

By Terri Martin Yates

Success. It's measured in many ways. Through achievements, through recognition and—oftentimes—in dollars and cents.

But two recent college graduates have broken what seems to be an unspoken rule (All College Graduates Want To Make Money—And Lots Of It) and have found a type of success which isn't exactly earning them a bankroll.

Success without money? A contradiction in terms? Not really. For Mike Sims and Sandy Vander-Heyden are successful—that is if being in the national spotlight shortly after graduation counts. And although they're not bringing home big bucks, both are content to have a supporting role in two of 1988's most-talked-about events: the presidential campaign and the Summer Olympics.

Sims, a May 1987 graduate of Texas A&M, is getting a behind-the-scenes look at politics as a travel aide to Democratic vice presidential nominee Sen. Lloyd Bentsen, while Vander-Heyden, a graduate of the University of New Hampshire in Durham, is preparing for international competition as a member of U.S. Field Hockey Team.

Sims, who spends much of his time on the road with the senator, says he

more less fell into his job. In May 1987, Sims was completing his undergraduate work in agriculture education at Texas A&M and preparing to enter law school. He'd already been accepted at Southern Methodist University and was on the waiting list at the University of Texas.

But the week of graduation he learned of an opening as a research assistant in agriculture and banking on Bentsen's staff and—with the help of Congressman Pete Geren (whose campaign Sims had worked on in 1986)—he got the job.

"I packed up everything my Camaro would hold," says Sims, "and I bought a map at Wal-Mart to show me how to get to Washington, D.C."

After six months in Washington, another opening came up; Bentsen needed a travel aide back in Texas. Sims jumped at the job and returned to Bentsen's Texas headquarters in Austin, where he now lives. At that time, Sims' job included doing advance work and follow-up work for the senator, such as finding accommodations, planning itineraries and writing follow-up and thank you letters.

But the most exciting portion of Sims' career has come since Democratic presidential nominee Massachusetts Gov. Michael Dukakis named Bentsen

as his running mate. Now, as travel aide to the senator, Sims is getting a firsthand look at the '88 campaign and national politics.

In his job, Sims keeps the senator informed of his agenda, carries the Cellular phone and travels the country with six other aides on the campaign plane. "My job is to provide the senator with anything he needs," said the 23-year-old Texan.

One of his campaign duties was setting up the senator's office at the Democratic National Convention in Atlanta. That meeting, Sims says, was his best experience in the job to date. "I'm a newcomer to this game," he says. "But even as a novice, I could really feel that the Democratic Party was drawn together. It was fabulous."

Sims is a newcomer to a national campaign, yes, but to politics, no. As a student at Plano Senior High School in Plano, Texas, which is just north of Dallas, Sims was voted vice president of the Texas chapter of Future Farmers of America, a group which then had 60,000 members. "That's really where I got interested in it," he says. "In a group that big, there's a lot of politics involved."

His political interests continued in college, where Sims was student body president during his senior year. But, he

says, none of his experiences compare to the work he's doing for the senator.

"The main thing I tell people is that I consider myself to still be in school—a two-year laboratory class. It's exciting, but there's a lot of responsibility placed on me. If one thing goes wrong, it can really snowball into a lot of other things. Then you're in trouble."

As for monetary rewards, Sims says his salary, which is between \$15,000 and \$25,000, is adequate. "I'm not getting rich off this...Like everybody else, I've got a VISA card and I try not to get past-dues too often," he says. "My salary is comfortable, but by no means generous."

As for the future, Sims says he hopes to go to law school in the fall of '89.

But for now Sims is content in his role in politics. "I'm learning a lot and watching other people do their jobs," he says. "I think I'm effective at maintaining a high level of professionalism and I'm learning to work and communicate with people who are much older than I am. But I'm sure some people are still saying, 'Who's this kid riding the campaign plane?'"

"Hopefully, when this is all over, they'll have some respect for me, too."

\* \* \* \* \*

Although field hockey is a tradition in Sandy Vander-Heyden's family, the member of the U.S. Field Hockey Team wasn't so sure she wanted to pursue the sport in college.

She'd played field hockey at New Hampshire's Wilton High School and had two sisters on collegiate teams, but Vander-Heyden was eyeing another sport when she enrolled at the University of New Hampshire: basketball.

"I looked around and the basketball players were really good...so I went out for field hockey instead—because I didn't think I could make basketball," she says. "That's the best decision I ever made."

That choice not only placed Vander-Heyden on a strong UNH team, but led to her being picked for the Olympic team alongside two of her UNH teammates.

The U.S. Field Hockey Team was chosen in 1986 after a series of Olympic

Development Camps. Vander-Heyden says she attended the camps in hopes of improving her game; making the actual team was a bonus.

"Our college coach said it was a good way to build your skills, so I went," said Vander-Heyden. "They made selections each week," she continued. "You'd start at C-Camp, the first level. Some people from there would go on to B-Camp, then to the top camp, A-Camp. When it was over, I was left."

"Sandy was always a very strong leader on the field," says UNH assistant coach and former teammate Karen Geromini. "She had an underlying confidence and at one time she was probably the best rusher in college hockey. Anytime we needed a defensive spark, Sandy came up with it."

But along with *Sandy Vander-Hayden*

improving her skills as a player, Vander-Heyden, 23, made certain sacrifices to attend the summer camps. Originally a pre-veterinary medicine major at the university, Vander-Heyden was faced with a decision. She could either spend her summers working at internships to beef up her resume for vet school or spend her time off at the developmental camps to improve her game.

The left-back chose the latter and a new major: physical education.

The May '87 graduate has spent much of her time traveling and training with the 16-member field hockey team. Since selections, the team has traveled to tournaments in Australia, Korea, Holland, Scotland, England and Spain and has

done quite well. The team defeated the Olympic team from Argentina, which was ranked fourth going into the Games.

Holland, ranked No. 1, will be the first team the U.S. plays in late September.

Vander-Heyden says the U.S. team is happy with its No. 5 ranking. "It's a good ranking to have," she said.

"We're looking at this like we're the underdog instead of having pressure on us."

But win or lose, Vander-Heyden says her experience on the team has been a good one. She's traveled the world—something she says she would never have been able to do otherwise—has made a lot of good friends among the team members and has seen an entirely new side of her chosen sport.

"In the U.S., field hockey's not a big spectator sport, but in Europe people really come out for it," she says. "In one tournament in England, 40,000 people came to watch us play. I've never seen that many people at anything but a football game."

But Vander-Heyden will likely see such crowds at the Summer Games and at least one face will be familiar. Helena Vander-Heyden, Sandy's mother, will be among the spectators in Seoul.

But chances are Mrs. Vander-Heyden and her husband Andre have seen more than their share of field hockey while their children were growing up. Daughters Pam, 28, and Debbie, 25, both played at New Hampshire colleges and Kristin, 19, recently joined the UNH team. "We've got a very athletic family," Sandy Vander-Heyden says. "I think they're more excited about the Olympics than I am...They're proud of how hard I've worked for it."

After the Games, Vander-Heyden says she'll hit the job trail. She doesn't have anything lined up, but would like to coach field hockey on the collegiate level. "I can see myself as an assistant coach somewhere," she says. "With a little teaching thrown in."

# AIDS

## Awareness

### On Campus

By Beth Wilson

Raul Collazo believes his fellow students at the University of Georgia pay more attention when he tells them about the dangers of AIDS than they would to a college official.

But the 21-year-old psychology graduate student says acquired immune deficiency syndrome still is an issue that seems like a distant problem to many students and they may not be putting into practice what they know about protecting themselves.

"It hasn't hit home for most of them, so they don't realize how serious it is," Collazo said.

Throughout the country, colleges and universities are grappling with ways to get AIDS information to students so they will recognize the dangers of the fatal disease that attacks the body's immune system.

Many universities, including the University of Georgia, are using other students such as Collazo in peer education programs designed to provide a more comfortable forum to talk about sex, condom use and other AIDS-related issues.

"I think that's probably the way to go," said Nancy MacNair, a health edu-

cator for University of Georgia's Student Health Services. "They know their fellow students better than we do."

The student programs are available to dormitories, fraternities, sororities and other campus organizations.

Collazo and his fellow students most frequently want to know how AIDS is transmitted and whether things they are doing put them at risk.

Medical officials at the federal Centers for Disease Control in Atlanta say the human immunodeficiency virus (HIV) that can cause AIDS is transmitted through sexual intercourse, the shar-

ing of drug needles, and transfusions of blood or blood products infected with the AIDS virus. AIDS is not transmitted through casual contact, they say.

Universities have come up with a variety of approaches in their attempts to get information to students and, in many cases, have become very open and explicit in their discussions about sex, contraception and sexually transmitted diseases.

The University of Utah has developed a pamphlet for all new students, which outlines specific sexual behavior that can reduce the chances of AIDS virus transmission, said Kathy King, a psychology intern who is in charge of coordinating AIDS education programs at the university.

Federal health officials have found, for example, that the use of condoms and spermicides during sexual intercourse reduces the risk of transmitting the AIDS virus.

King said she has seen a wide range of responses to AIDS discussions from the Utah students.

The University of Texas in Austin has just begun an AIDS speaker's bureau, said Sherry Bell, director of health education at the Student Health Center. Speakers are available to talk about a variety of AIDS issues, including specifics on how to use a condom and how to discuss safer sex practices with a partner.

Bell said she believes there is an increasing awareness of the danger of AIDS on campus, but students still don't have all of the information they want and need.

University of Texas officials have had better success with programs offered to what Bell called a "captive audience" in classrooms than with presentations offered to the campus at large.

"They think they know a lot because they hear about it all the time," she said. "But there's a lot of misinformation out there."

That's why health officials say they spend just as much time focusing on the way AIDS is not transmitted.

"The students want guarantees about remote things," Bell said. "The ways we know AIDS is transmitted, the behavior changes, get overshadowed."

The same is true at Pennsylvania State University, where Susan Kennedy, director of health promotion and education, said students realize AIDS is a threat, but she doesn't think many have

changed their sexual practices.

Kennedy said college students, many of whom are beginning to be sexually active, may not be taking precautions because their actions often are not well thought out.

Penn State also has several AIDS education programs, including a student group, which is available for presentations and discussions.

"The students are good role models and they're comfortable talking about these issues," Kennedy said.

A preliminary review of a recent national study has indicated college

Photo by Wynn Kendall

students across the country know how AIDS is transmitted and how they can protect themselves during sex, said Craig Hill, a research associate at The Kinsey Institute for Research in Sex, Gender and Reproduction at Indiana University.

"But we shouldn't let up in our attempts to educate," he said. "There's a difference in knowing what causes AIDS and thinking you are susceptible...Everybody is at risk if they engage in certain kinds of risky behavior."

Hill said other researchers have found that people are more likely to change their sexual behavior if they know someone who has AIDS or is infected with HIV.

And, he said, college students seem to have changed their sexual habits more on the east and west coasts than in the middle part of the country, probably because AIDS has been more prevalent on the coasts. The four states reporting the most cases of AIDS are New York, California, Florida and New Jersey. Collectively, the four top states have reported almost 43,000 AIDS cases. As of August, the total number of cases reported to the CDC was 71,171. Of those, 40,090 have died.

The CDC is about to begin the first nationwide study to determine the prevalence of the AIDS virus among college students. Anonymous testing at 20 colleges and universities should help health officials get a better idea of how great the problem is, said Chuck Fallis, a spokesman for the CDC. The testing program was to begin this fall at universities which agreed to be part of the study. The CDC has not released the names of the schools involved.

Hill said college age people are more susceptible to AIDS than any other age group, because they are moving away from home and more likely to begin sexual exploration.

The Alan Guttmacher Institute in New York released a recent study indicating that the percentage of single women between 18 and 44 who were having sex increased between 1982 and 1987. The study also showed that condom use, although it has increased slightly, remains low, even though favorable opinion of the condom rose sharply.

The Guttmacher research indicates that the increase occurred during 1986 and early 1987, when discussion about AIDS and recommendations to use condoms became more common.

Hill said it's important for colleges to offer programs that help students understand the dangers of AIDS, as well as overcome peer pressures that may cause them to engage in activities that put them at risk.

At the University of Georgia, MacNair said officials are trying to find ways to make the programs appeal to students. Modern videos and an AIDS jeopardy game "appeal to this generation," she said. "Marketing and selling are important in education." One of Georgia's videos, for example, demonstrates the proper use of a condom on a banana. The video is available for classes or student groups to use during AIDS discussions.

MacNair said she also believes university officials have to let students know they are open to frank discussions.

"I think it's a hard battle," she said. "It's a scary issue, but it's an important one to deal with on campus. It's the most important health issue around right now."

# OVERCOME TEST ANXIETY AND SCORE HIGH!

## Exam Week Jitters

Anything you can do to regularize your life on exam week works in your favor. It will increase your ability to concentrate and relax some of your tension and anxiety. Try to stabilize your habits a bit if they've been getting loose. Exam week is not the time to decide to lose 10 pounds, but you can watch your eating habits a bit more. You definitely should have several good nights' sleep. Every exam period you can spot the poor fools who were in bed before midnight for the first time in weeks. A shower may wake them up, but they won't escape from dullness of the brain.

## Pencils Ready, Get Set, GO!

1. Maintain a rhythm as you work. If you find yourself taking longer than usual to answer a question, skip it and mark it in the margin. If you don't have time to check all your answers later, just return to those you've left.
2. Make another mark next to answers you're not 100% sure of. But change them only if you have clear reason to... your first impulse might have been right.
3. Follow directions on marking answers. Don't underline if you're asked to circle. Sounds obvious? You'd be surprised how common a mistake this is.
4. Watch for those teeny little words that change an ordinary statement into a radical one: *all, always, must, never, none*. Don't jump to conclusions. Look for the real meaning of a question.

Performing well on exams is more than knowing the material. You can increase your scores with these test-taking tips.

## Budget Your Time

Be sure from the start that you'll complete the entire exam. Start your test period by skimming all the questions. Then figure out how much time to devote to each section. Allow more time to sections which are worth more points. Don't forget to allow time for checking the test over once at the end. Build a little slack into the schedule if you can... you just never know.

If you give yourself 20 minutes for a major essay, you might time that, too, perhaps something like this:

- Examination of the question: 1 minute
- Development of the answer: 6 minutes
- Actual writing time: 10 minutes
- Reread and edit: 3 minutes

## Your Official Exam Kit

- Packing a special kit to bring to every exam will help you feel confident and prepared. You'll avoid the stress and panic that ruins scores. Use your backpack, bookbag, or an "official exam bag" of your own design. Here's our list. Add to it if necessary.
- ▶ 2 each, pens and pencils, with good eraser;
  - ▶ blue books... if not necessary, they're always excellent for scratch paper;
  - ▶ ruler, for a straight edge;
  - ▶ calculator, if it's allowed;
  - ▶ Kleenex;
  - ▶ any books or notes allowed by the teacher;
  - ▶ a watch that works;
  - ▶ a bit of food if not prohibited... not a meal, just a few raisins or sunflower seeds or chocolate.
